#### **DETAILED ACTION**

#### Response to Amendment

1. The reply filed on 03/26/03 consists of amendments to claim 1 and remarks related to rejection of claims. The claims are not allowable as explained below.

#### Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1- 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okabe in view of Applicant's admitted prior art (AAPA).

Okabe (Figures 1-11) shows an electrical connector having a connector housing 31 with a plurality of terminal receiving sections 32 with extra room for receiving and allowing movement of a plurality of terminals T. Each section has sidewalls on both sides and a pair of projections 41 projecting inwardly directly opposite of each other for holding an electric wire 3 at the rear end. The projections are flexible in the radial direction of the wire and are on the open topside of the housing. Each terminal has an electrical contact portion at one end and a wire joint portion at the other end connected by a sheet-like flexible connecting part 6 extending from a base portion of the contact portion. The connecting part has a pair of cut-outs on the sides, which makes the width of connecting part less than the width of the base of the contact portion and the base of the wire joint portion. The housing has a plurality of walls 35 in the terminal receiving

Application/Control Number: 09/973,463

Art Unit: 2839

section to hold the terminals at the cutouts. But Okabe does not show the projections 41 to be straight and rectangular. The instant invention does not provide any reasons or specific problem to be solved by the projections 41 being straight and rectangular. Such a feature is well known. Okabe shows projections 35 to be on the top open side of the housing and being straight with a front rectangular portion to hold the terminal. AAPA (Figure 6 and description of Figure 6 of the instant invention) shows straight rectangular projections 70 for holding the wire as well as bending top portion of clamping pieces 71 to hold the wire. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to make the projection 41 to be straight and rectangular because this would simplify construction and thus, would be cheaper to manufacture.

#### Response to Arguments

4. Applicant's arguments with respect to claims 1-4 and 6 have been considered but are most in view of the new ground(s) of rejection. Okabe in view of AAPA shows all the features as described in Paragraph 3 above.

#### Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 09/973,463

Art Unit: 2839

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

#### Contact Information

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandrika Prasad whose telephone number is (703) 308-0977.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild, can be reached at (703) 308-2710. The fax number for this Group is (703) 872-9318 (general) and (703) 872-9319 for after-final.

Any inquiry of a general nature or relating to the status of this application or processing should be directed to the Group receptionist whose telephone number is (703) 308-1782.
